

5-IN-1 SUPER SPREADER

LS 655

FARMERS TALK, WE LISTEN

We design our spreaders by listening carefully to what farmers say, then deliver extra value by using the highest quality materials with a firm commitment to uncompromising workmanship.

The LS-655 has a capacity of 65 cubic feet and is designed for a maximum payload of 3 tons. The standard hydraulic drive utilizes the convenience of tractor remotes and requires only 8 gallon per minute to function at maximum capacity, saving you time getting to the field and back home.

The Lanco model LS-655 is also referred to as the 5-in-1 Super Spreader because of its versatility. The machine is designed to spread all of the basic materials handled by a farmer. This is accomplished through the ability to quickly and simply change attachments as the job requires.

One look and you'll see the difference. Lanco Spreaders are what every farmer looks for. How do we know? We asked.

Smart design and heavy duty construction provide the perfect combination of durability, reliability and spreading precision.
