

K-MODEL LITTER/LIME SPREADERS

LS-1150K
LS-1680K

FARMERS TALK, WE LISTEN

Smart design and heavy duty construction provide the perfect combination of durability, reliability and spreading precision.

The Lanco 1150K and 1680K models are the ideal solution for those who don't require the capacity our regular Litter models deliver.

The K series provide the same spread pattern and material compatibility as their larger capacity Litter/Lime counterparts with a smaller footprint. Their lighter weight means K series spreaders can be used in conjunction with smaller tractors, similar to the Lime models.

One look and you'll see the difference. Lanco Spreaders are what every farmer looks for. How do we know? We asked.

OPTIONAL - ADVANCED HYDRAULIC SYSTEM

The precision of "electronics-overhydraulics" can't be beat. Electronic sensors in the wheels send continuous signals to the hydraulic system. Applications are consistent and precise regardless of ground speed.

UNIQUE VERSATILITY BRINGS ADDED VALUE

Easy to remove spinner attachment provides the flexibility to use the machine as a spreader or grain cart.

WALKING BEAM SUSPENSION

Super-duty walking beam suspension helps absorb and distribute stress on the spreader when traveling rough terrain. This helps make operation easier and can add years to service life.
